

Dear Hiring Manager,

I am writing to express my interest in your open position. As a tech enthusiast with a background in programming languages such as C++, Java (Spring Boot), React.js, Node.js, and Express.js, I believe I am an ideal fit for this role. I also possess a deep understanding of data structures, algorithms, and computer fundamentals, all of which form the foundation of my problem-solving abilities.

During my internship at Atlassian, I had the privilege of working on complex tasks and large codebases, honing my ability to write efficient code and thorough documentation. A key project I executed involved implementing an event-driven system that utilized the event payload from the DC instance event plugin to accurately replicate tickets within the cloud instance. This experience provided me with valuable insights into system dynamics and event-driven programming. Additionally, I enhanced an existing API to accommodate a broader range of products. I also developed a middleware solution that bypass the admins for an endpoint irrespective of the product type. Furthermore, I wrote unit and integration test cases for all my tasks, significantly increasing the test coverage of our database file. This proactive approach ensured higher Assistant accuracy and reliability in our database.

I also got the opportunity to work on a frontend project where I enabled internationalization using Atlassian specific middleware service which automate the translation of strings to be localized. I also created two generic components for email and summary field. Integrated SonarQube for continuous evaluation of code quality and test coverage. Automated the base react functional component creation using CLI with boiler plate code along with test and storybook file, I utilized Plop library to implement this.

My ability to adapt quickly to new environments, combined with my eagerness to learn, sets me apart from others. I'm confident that my unique blend of experience, skills, and commitment would make me a valuable addition to your team.

Thank you for considering my application. I look forward to the possibility of contributing to your team.

Sincerely,

Anjali Gupta
